

# Personalised proposals that connect with customers

Provide your clients with timely, personalised and informative proposals, showcasing your brand and why you should be trusted to sell their property.

RP Proposals is an interactive, digital proposal solution that allows you to quickly design and present your services and brand to help you win new listings.

Display property and vendor information, market trends, recent sales, comparable properties and suburb stats directly from your RP Data platform to create a digital, personalised proposal with full viewer tracking. This tracking and reporting can then help you to determine who is engaged and who to follow up. Now you know who to contact and when, improving your conversions and shortening your listings pipeline.

The integrated system can help Agents lead with a signature CMA, follow through and win the business with a tailored proposal.

## Stand out from competitors

with bespoke, on brand and interactive digital proposals that may help you win more listings and engage vendors.

## Edit your proposals with ease

RP Proposals features in-line editing capabilities, making it quick and easy to change or add text to your proposal and pre-listings kits.

## Display CoreLogic market insights and data

to equip you with the knowledge needed to be positioned as a local and trusted expert.

## Receive visibility on client interactions

so you know who has viewed or shared your proposals to tailor your follow-up.
